

MONTEREY CONSERVATION COMMISSION
MINUTES – June 11, 2001

Present: Chris Blair, David Logan, Rick Andrus, Tim Lovett, Ray Tryon

Dodge, William – RDA – Determination N3

Tim Lovitt, Project Manager

Applicant represented by Anthony Barnaba, Blueline Design. Mr. Barnaba indicated the silt fencing was still in place from a previous project at the site, and that it's placement would protect the resource area. Applicant will make sure it is still properly installed. Plans were approved as submitted.

Dolber, Alan – continuation of the continued dolber meeting.

David Dempsey, Project Manager

Mr. and Mrs. Alan Dolber were present with their attorney, Ed McCormick. The Commission reiterated the requirements for the replanting of the trees that were clear cut, resulting from a violation of the Dolber's Determination of Applicability dated October 12, 1999. The scope of work as outlined by Guy Winig, the Commission's consultant, was presented to the Dolbers, and the Commission advised them that it would be in their best interest to hire their own consultant in order to review Mr. Winig's plans. The meeting has been continued until such time as the Dolber's get a plan in place that is acceptable to both them and the Commission for the replanting of trees which shall include species, location, and size of trees.

Stevens Lake Association – Lin Schreiber had scheduled an informal meeting to discuss the possibility of a draw down of Stevens Lake in order to inhibit the on-going extensive weed growth. No one from the Association was present, and the Commission discussed the ramifications of a draw down of this lake, and other possible remedies to control the weed population.

Chapter 61 Consideration, Sheldon Property – There was a general discussion covering the chapter 61 land of Marc Sheldon. Attached to these Minutes is a memorandum from Chris Blair, Chair of the Conservation Commission, expressing the Commission's views on this subject.

Mail was read, and meeting adjourned at 8:30 p.m.
